

1/53 acetyltransferase

0/17 antigen binding

2/93 single-stranded DNA binding

27/682 RNA binding

3/160 actin binding

12/140 gated channel

9/221 protein serine/threonine kinase

4/34 ATPase regulator

7/43 dynein light intermediate chain binding

1/38 oxidoreduction-driven active transmembrane transporter

0/14 guanylate cyclase

1/12 neurotransmitter:sodium symporter

22/674 ribonucleoprotein complex

25/470 mitochondrial envelope

15/287 anchoring junction

0/14 guanylate cyclase complex, soluble

24/459 cilium

3/40 histone deacetylase complex

12/161 protein folding

6/176 nucleoside triphosphate metabolic process

19/578 DNA metabolic process

9/390 ribonucleoprotein complex biogenesis

1/83 leukocyte migration

20/398 cell projection assembly

4/55 aminoglycan catabolic process
