

8/78 organic acid binding

24/646 adenylyl ribonucleotide binding

14/180 ligase

3/57 ligase, forming carbon–oxygen bonds

0/15 protein kinase C inhibitor

2/129 molecular function inhibitor

1/36 protein serine/threonine kinase inhibitor

0/64 ubiquitin–like protein binding

3/56 protease binding

1/12 phosphatidylinositol transfer

2/38 phospholipid transporter

0/52 phosphatidylinositol bisphosphate binding

7/159 phospholipid binding

1/42 plus–end–directed microtubule motor

6/141 polypeptide conformation or assembly isomerase

11/365 macromolecular conformation isomerase

21/619 ATP–dependent

6/208 tubulin binding

11/440 cytoskeletal protein binding

1/23 beta–tubulin binding

2/108 calcium ion transmembrane transporter

1/24 P–type calcium transporter

7/239 metal ion transmembrane transporter

15/507 mRNA binding

0/35 basal transcription machinery binding

2/11 large ribosomal subunit rRNA binding

2/62 rRNA binding

14/341 structural molecule

12/201 structural constituent of ribosome

1/25 transferase, transferring nitrogenous groups

4/32 aspartic–type peptidase
