

7/128 ERAD pathway

148/1745 proteolysis

24/249 response to endoplasmic reticulum stress

35/368 regulation of protein stability

24/194 detoxification

38/660 organelle fission

28/315 regulation of small GTPase mediated signal transduction

16/350 cell fate specification

98/1543 cell fate commitment

11/141 cardiac chamber development

6/189 leg disc development

159/2410 regulation of nervous system development

4/143 cardiac muscle tissue development

39/598 regulation of Wnt signaling pathway

10/184 limb development

17/186 regulation of ossification

3/96 male anatomical structure morphogenesis

22/420 reproductive system development

23/399 morphogenesis of an epithelial sheet

43/816 actin filament-based process

150/2312 cytoskeleton organization

9/136 muscle attachment

85/1289 regulation of cellular component biogenesis

15/359 regulation of synapse structure or

14/168 skeletal muscle organ development

7/88 branching involved in open tracheal system development

25/439 locomotory behavior

7/150 visual behavior

104/1530 cell-cell signaling

3/36 gamma-aminobutyric acid signaling pathway

16/205 inorganic anion transport

31/559 positive regulation of cell cycle phase transition

10/131 neuromuscular process

98/1280 regulation of monoatomic ion transport

11/117 detection of light stimulus

10/133 chemosensory behavior

12/206 reproductive behavior

16/188 sodium ion transport

7/83 response to fatty acid

25/282 response to acid chemical

28/347 cellular response to external stimulus

7/136 peptidyl-serine modification

7/118 mitochondrial gene expression

100/1529 peptide transport

34/431 localization within membrane

95/1214 RNA processing

12/112 ribosomal large subunit biogenesis

35/479 obsolete ncRNA metabolic process

5/57 spliceosomal complex assembly

2/26 cytochrome complex assembly

47/664 mitochondrion organization

12/212 mitochondrial transport
